
Official Public Comment 92

Dear EIS/EIR Team Members:

I support a diversion of no more that 30 percent of the natural water flow from the Trinity River Basin. While I support the science and study that produced the Flow Evaluation Report, the recommendations were limited by an assumption about the amount of water that could be available for the river. Legislation creating the Trinity River Division, and additional legislation clearly gives Trinity fish and wildlife priority over the diversion of any water to the CVP. Therefore, the Preferred Alternative does not go far enough to achieve a legally mandated restoration of the ecosystem.

Thank You,

Name: BARBARA ANDERSON

I support a diversion of no more that 30 percent of the natural water flow from the Trinity River Basin. While I support the science and study that produced the Flow Evaluation Report, the recommendations were limited by an assumption about the amount of water that could be available for the river. Legislation creating the Trinity River Division, and additional legislation clearly gives Trinity fish and wildlife priority over the diversion of any water to the CVP. Therefore, the Preferred Alternative does not go far enough to achieve a legally mandated restoration of the ecosystem.

Thank You,

Arcata, CA 95521

Nov. 11, 1999

Dear EIS/EIR Team Member,

The original action of diverting water from the Trinity watershed to the central valley was supposed to not be detrimental to Trinity River fish and wildlife resources. Such has clearly not been the case as is summarized in the Environmental Impact Statement/Report Executive Summary. I applaud the recognition that something must be done to rectify this wrong, but I am concerned that the Trinity fish and wildlife are not given priority over CVP diversion. I feel that fish and wildlife must be given priority and urge you to allow the diversion of no more than 30% of the flow from the Trinity River Basin. 165-1

The restoration of fisheries in California is also very much an economic necessity, for sport and commercial fishing. You see by my letterhead that I owe my livelihood to sport fishing. I look forward to a better future for fisheries in the Trinity River in the future. I caught my first steelhead on the upper Trinity and now hope to catch many more! Thank you for your attention.

Sincerely,
Per Brandin

IGR/CEQA Review
TRI-Var-Var
Trinity River Mainstem Fishery
Restoration
Draft EIR/EIS
SCH #94123009

November 8, 1999

166

Mr. Tom Stokely
Trinity County Planning Department
P.O. Box 156
Hayfork, CA 96041-0156

Dear Mr. Stokey:

Caltrans District 2 has completed review of the Trinity River Mainstem Fishery Restoration Environmental Impact Statement/Report submitted on behalf of the U.S. Fish and Wildlife Service, U.S. Bureau of Reclamation, Hoopa Valley Tribe and Trinity County, for the restoration of the natural production of anadromous fish on the Trinity River mainstem of Lewiston Dam through managed flows combine with mechanical rehabilitation projects.

Based on the project information submitted, approval of this action could impact facilities under our jurisdiction. The project identifies various potential channel rehabilitation sites near State Route 299 and State Route 3 in Trinity County. Because stream modifications in these areas could impact Caltrans bridge structures, we request notification of any channel rehabilitation or alteration 1 mile upstream or downstream of our facilities. } 166-1

Thank you for providing us the opportunity to review this project. If you have any questions, or if the scope of this project changes, please call me at (530) 225-3369.

Sincerely,

Andrea Redamonti

ANDREA REDAMONTI
Local Development Review
District 2

Letter from Department of Transportation Dated November 8, 1999

166-1 Channel rehabilitation sites noted by the commentor would be subject to site-specific environmental review. The California Department of Transportation would be notified during these review processes. Additionally, the California Department of Transportation would be notified prior to restoration actions that may affect roads under Department jurisdiction, and bridge modifications that may be necessary to implement flow schedules under the Maximum Flow, Flow Evaluation, or Percent Inflow Alternatives. Please see thematic response titled "Description of the Proposed Action/Segmenting."

167

November 14, 1999

Mr. Joe Polos
U.S. Fish and Wildlife Service
1125 16th Street, Room 209
Arcata, California 95521

Dear Mr. Polos and EIS/EIR Team Members:

I feel that Trinity River fish and wildlife should be given priority over the diversion of any water to the CVP.

It's about time that we humans recognize the rights of survival for the many other living things that try to share this planet with us.

The Preferred Alternative is not adequate for this purpose. } 167-1

Sincerely yours,
Ted Trichilo
P.O. Box 462
Fortuna, California
95540

Letter from Ted Trichilo Dated November 14, 1999

167-1 Regarding the adequacy of the Preferred Alternative, please see thematic response titled "No Action Alternative/Existing Conditions Scenario and Range of Alternatives."

Mr. Joe Polos
U.S. Fish & Wildlife Service
1125 16th Street, Room 209
Arcata, CA 95521

168

Dear Mr. Polos,

I am writing you today to express my concern over the Draft Trinity River Restoration Environmental Impact Statement. In order to restore the Trinity River and its entire ecosystem, **I urge you to adopt a management system that returns at least 70% of the flow for the Trinity River.** Science has demonstrated that a river needs at least 70% of its flow to maintain a healthy fishery. 168-1

The Trinity River Act of 1955 states that it is essential that fish and wildlife not face extinction. Unfortunately, extinction is exactly what is happening for fish populations of the Trinity River, where coho salmon are listed as an endangered species and steelhead are a candidate for listing. Overall, fish populations have declined by 90% since the Trinity River Act was enacted into law in 1955. Further misguided management of the Trinity River ecosystem should be avoided. Restoration of the Trinity River is mandated through the Trinity River Basin Fish and Wildlife Management Act of 1984. In addition, as a result of excessive water diversion, two American Indian tribes, the Hoopa Valley and Yurok, have been denied water rights to the Trinity River. The time is now to respect past laws and restore the Trinity River to at least 70% of its flow capacity.

I urge you to make restoration a top priority for the entire Trinity River ecosystem. **Only when the Trinity River is restored, will the commercial and sport fishing, rafting, and tourism economies of Northern California rebound.** Thank you for your time and consideration in this matter.

Sincerely,

Hope Jauna
P.O. Box 58
Camp Meeker, Ca. 95419
