Dear Mr. Polos,

I am writing to ask that sufficient water be released to the Trinity River to protect and improve fish habitat. I understand that the numbers of salmon and steelhead have decreased drastically since the Clair Engle and Lewiston dams were put in.

I really love the Trinity River and its wildlife. Every autumn I canoe the river near Lewiston. I enjoy watching the salmon swim upstream. Anything you can do to protect all the wildlife there would be important to me.

Sincerely yours,
Tehesita Haag

434-1

Letter from Tehesita Haag

434-1 The DEIS/EIR evaluated the effects of a range of flow alternatives to anadromous fishery resources. For a more detailed discussion of these alternatives in relation to fish habitat, please see Section 3.5 Fishery Resources.

Joe Polos
U.S. Fish and Wildlife Service
Arcata, CA.

It is important that the State of California fulfill its obligations to the Indian tribes and all citizens of the state by restoring the fisheries of the Trinity River. This means restoring flow to 70% of normal, which can be done easily since some of the Westside lands are no longer irrigated. Restoring fisheries will help the distressed economies of northern California, and increased water flow will stimulate rafting and tourism.

Sincerely
Robert G Hawthorne
531 Joaquetta Ct.
Healdsburg, CA 95448

TO: JOE POLOS

RE: REDIRECTING WATER TO THE TRINITY RIVER

DEAR MR. POLOS:

I SUPPORT THE IMPLEMENTATION OF A FLOW REGIME THAT RESTORES THE TRINITY RIVER TO KEEP AT LEAST 70% OF ITS FLOW. 436-1

AS A MEMBER OF THE SEQUOIA PADDLING CLUB OF THE SIERRA CLUB, I HAVE LEARNED HOW SUCH A PROGRAM WOULD ENHANCE THE FISHING (FOR THE INDIANS AND SPORT FISHING), BOATING AND TOURISM IN THE TRINITY RIVER REGION.

YOURS TRULY,
GAIL JONAS

Letter from Gail Jonas Dated November 21, 1999

436-1 Please see thematic responses titled "Fisheries."

437

Joe Polos
US Fish & Wildlife

Dear Sir,

I am writing to encourage you to request that 70% of the Trinity River is returned to its natural corridor. This can be achieved by retiring the no-longer-productive land in the Westlands Water District permanently. Although the "preferred alternative" of 48% increased flow + mechanical restoration would be an improvement - there is no mechanism to require that the mechanical restoration will continue to be performed when needed. 437-1 437-2

The Trinity River Act of 1955 requires that the Trinity not be harmed by the diversion project. The time has come to honor that commitment which precedes any commitment to water users. I am already on your mailing

Letter from Jonathan McClelland Dated November 21, 1999

437-1 Please see thematic responses titled "Fisheries."

437-2 Please see thematic response titled "Implementation Funding and Relationship to Repayment, Reimbursement, and the CVPIA Restoration Fund."

Letter from Jonathan McClelland continued

list and dont need additional literature on this issue.

Thank you for considering my opinion in the drafting of the Final EIS-EIR.

Sincerely,

Jonathan McClelland

4740 Hall Rd

Santa Rosa, Ca. 95401

Nov 21, 1999

Dear Ms. Peters

This letter is to inform you that as an interested concerned with the decline of anadromous fish I am in support to divert as much water back into the Trinity River by redirecting waters that are presently being reserved for irrigation of non-agriculture lands.

I trust that you will be able to make a sound decision to rehabilitate and recreate a healthy fishery in the Trinity River.

with respect

Robert Clemens

438-1

Letter from Robert Clemens Dated November 21, 1999

438-1 Thank you for your comment. Your comment has been noted. No response is required.

YOUR COMMENTS NOW WILL RESTORE THE TRINITY RIVER!

Draft Trinity River Environmental Impact Statement and Report (EIS/R) now open for public comments!

After 36 years of devastating water diversions to agricultural interests south of the San Francisco Bay Delta, the long beleaguered Trinity River **NOW** has an historic opportunity to be revitalized. Our efforts during **this 47-day public comment period** will directly help return some of the Trinity s much needed water back to the River and to restore the once premier salmon and steelhead runs.

Please turn over

Official Public Comment 439

Dear EIS/EIR Team Members:

I support a diversion of no more that 30 percent of the natural water flow from the Trinity River Basin. While I support the science and study that produced the Flow Evaluation Report, the recommendations were limited by an assumption about the amount of water that could be available for the river. Legislation creating the Trinity River Division, and additional legislation clearly gives Trinity fish and wildlife priority over the diversion of any water to the CVP. Therefore, the Preferred Alternative does not go far enough to achieve a legally mandated restoration of the ecosystem.

Thank You,

Official Public Comment 474

Dear EIS/EIR Team Members:

I support a diversion of no more that 30 percent of the natural water flow from the Trinity River Basin. While I support the science and study that produced the Flow Evaluation Report, the recommendations were limited by an assumption about the amount of water that could be available for the river. Legislation creating the Trinity River Division, and additional legislation clearly gives Trinity fish and wildlife priority over the diversion of any water to the CVP. Therefore, the Preferred Alternative does not go far enough to achieve a legally mandated restoration of the ecosystem.

Thank You,

Name: R.K. Lewis

Official Public Comment 515

Dear EIS/EIR Team Members:

I support a diversion of no more that 30 percent of the natural water flow from the Trinity River Basin. While I support the science and study that produced the Flow Evaluation Report, the recommendations were limited by an assumption about the amount of water that could be available for the river. Legislation creating the Trinity River Division, and additional legislation clearly gives Trinity fish and wildlife priority over the diversion of any water to the CVP. Therefore, the Preferred Alternative does not go far enough to achieve a legally mandated restoration of the ecosystem.

Thank You,

Name: PHILLIP W. SHOPBELL
