Official Public Comment 3759

Dear EIS/EIR Team Members:

I support a diversion of no more that 30 percent of the natural water flow from the Trinity River Basin. While I support the science and study that produced the Flow Evaluation Report, the recommendations were limited by an assumption about the amount of water that could be available for the river. Legislation creating the Trinity River Division, and additional legislation clearly gives Trinity fish and wildlife priority over the diversion of any water to the CVP. Therefore, the Preferred Alternative does not go far enough to achieve a legally mandated restoration of the ecosystem.

Thank You,

Name: ERIK OSBUN

Address: 2460 HOLT AVE.

City/State/Zip: EL CENTRO, CALIF 92243

Official Public Comment 3800

Dear EIS/EIR Team Members:

I support a diversion of no more that 30 percent of the natural water flow from the Trinity River Basin. While I support the science and study that produced the Flow Evaluation Report, the recommendations were limited by an assumption about the amount of water that could be available for the river. Legislation creating the Trinity River Division, and additional legislation clearly gives Trinity fish and wildlife priority over the diversion of any water to the CVP. Therefore, the Preferred Alternative does not go far enough to achieve a legally mandated restoration of the ecosystem.

Thank You,

Mr. Joe Polos
United States Fish and Wildlife Service
1125 16th Street, Room 209
Arcata, CA 95521

Dear Mr. Polos:

As a concerned citizens living above the Trinity River we would like to see the dam removed and let the River's natural flow recommence. However, we know this isn't likely to happen in our lifetimes, so we must support the opinion that thirty percent of the natural flow will be a more healthy alternative than the current flow allotment. The study produced by the Flow Evaluation Report is flawed in the assumption of the amount of water, which would be available for the river. Trinity fish and wildlife have natural priority over any water diversion. The Preferred Alternative does not go far enough to achieve a legally mandated restoration of the ecosystem. 3841-1

Thank you for your time, and a healthy new century for all of us, human and non-human, alike.

Joe Polos
US Fish & Wildlife Service
1125 16th St.
Arcata CA 95521

Dear Joe Polos,

I support a diversion of NO MORE than 30% of the natural water flow from the Trinity River Basin. While I support the science & study that produced the flow evaluation Report, the recommendations were limited by an assumption about the amount of water that could be available for the river. Legislation creating the Trinity River Division, and additional legislation clearly gives Trinity fish + wildlife priority over the diversion of any water to the CVP. Therefore, the Preferred Alternative does not go far enough to achieve a legally mandated restoration of the ecosystem. PLEASE ACT to protect our legacy into the new century!!
THANK you! Please respond.

Sincerely,
Marcie B
