of the Colorado Desert (Bard, Palo Verde, and Imperial and Coachella Valleys), creates year-round conditions for continuous mosquito breeding among species like *Culex tarsalis* that are highly efficient vectors of mosquito-borne encephalitis. Both western equine encephalomyelitis (WEE) and St. Louis Encephalitis (SLE) viruses are hyperendemic to the Colorado Desert with viruses being isolated routinely from mosquito pools. More recently, SLE appears to have become well established in the Los Angeles Basin as a direct result of waste water disposal practices which enhances SLE transmission by urban production of *Cx. tarsalis* and *Cx. quinquefasciatus* (Say).

Southern California supports a number of species that are unique to the region. Both *Psorophora columbiae* (Dyar and Knab) and *Ps. signipennis* (Coquillett) are found in agriculturally developed areas of the Colorado Desert along with *Ochlerotatus thelcter* (Dyar) and the tree hole breeding *Oc. deserticola* (Zavortink) and *Oc. purpureipes* (Aitken). Populations of *Uranotaenia anhydor* (Dyar) have been found at Saratoga Springs within Death Valley National Monument and Anza-Borrego Desert (San Felipe Creek). Two species of *Culex* within the subgenus *Melanoconion* include *Cx. anips* Dyar (San Diego County) and recently discovered *Cx. erraticus* (Dyar & Knab) (Imperial County). In the future, human activity and changes in agricultural practices may result in the establishment of a number of species found in western Arizona and northern Baja California. Surveillance efforts along the lower Colorado River may eventually sample "encroaching" populations of *Oc. trivittatus* (Coquillett), *Oc. sollicitans* (Walker), and *Ps. howardii* (Coquillett). Coastal areas may have to deal with a fortuitous introduction of the "Asian Tiger Mosquito," *Aedes albopictus* (Skuse) and the "Yellow Fever Mosquito," *Ae. aegypti* (Linnaeus).

REGIONAL DIVISION OF CALIFORNIA COUNTIES

<u>I - Coastal California</u>		
Alameda	Mendocino	Santa Clara
Contra Costa	Monterey	Santa Cruz
Del Norte	Napa	Solano
Humboldt	San Benito	Sonoma
Lake	San Francisco	
Marin	San Mateo	
<u>II - Great Basin and Eastern Sierras</u>		
Alpine	Mono	Siskiyou
Inyo	Plumas	Trinity
Lassen	Shasta	
Modoc	Sierra	
<u>III - Central Valley and Western Sierras</u>		
Amador	Kings	Stanislaus
Butte	Madera	Sutter
Calaveras	Mariposa	Tehama
Colusa	Merced	Tulare
El Dorado	Nevada	Tuolumne
Fresno	Placer	Yolo
Glenn	Sacramento	Yuba
Kern	San Joaquin	
<u>IV - Southern California</u>		
Imperial	Riverside	San Luis Obispo
Los Angeles	San Bernardino	Santa Barbara
Orange	San Diego	Ventura

ACKNOWLEDGMENTS

The completion of this regional mosquito identification manual was made possible by the efforts of many organizations and dedicated individuals. The author extends his sincere thanks to all of those who helped make this publication a reality.

Recognition is extended to past and present members of the Mosquito and Vector Control Association of California Publications Committee currently chaired by Dr. Jack E. Hazelrigg, along with a select cadre of regional biologists and entomologists who provided constructive guidance in the selection of the species presented in this manual. Therefore, the following individuals and respective organizations should be recognized for their deserving efforts:

Stephen L. Durso, formerly with Antelope Valley Mosquito and Vector Control District, who helped with the critical review of the text, formatting of the keys, and style presentation of the accompanying biological information.

James Caton, formerly with Delta Vector Control District, for his efforts in developing the arrangement of the species presented in the keys.

Dr. James Webb, Jr., Stephen Bennett, and Robert Cummings of the Orange County Vector Control District; Dr. Jeffrey Beehler, formerly of Northwest Mosquito and Vector Control District; and Dr. Kenn Fujioka of the San Gabriel Valley Mosquito and Vector Control District; all whom provided their valued recommendations for the final selection of the common mosquito species included in the adult and larval keys.

Jodie Stoddard, Justine Keller, and Cheryl Stewart (formerly) of the Orange County Vector Control District for their efforts in preparing the drafts and final copy of this manual.

The Board of Directors and Officers of the American Mosquito and Vector Control Association who graciously granted their permission to reprint selected figures from *Identification and Geographical Distribution of the Mosquitoes of North America, North of Mexico* by R. F. Darsie and R. W. Ward.

The Board of Directors and Officers of the Mosquito and Vector Control Association of California who recognized the need for the development and eventual publication of the regional mosquito guide series.

THE MOSQUITOES OF CALIFORNIA (HIGHLIGHTING THOSE OF SOUTHERN CALIFORNIA)

* <i>Anopheles franciscanus</i>	* <i>Ochlerotatus melanimon</i>	* <i>Culex pipiens</i>
* <i>Anopheles freeborni</i>	* <i>Ochlerotatus nigromaculis</i>	* <i>Culex quinquefasciatus</i>
* <i>Anopheles hermsi</i>	<i>Ochlerotatus niphadopsis</i>	** <i>Culex reevesi</i>
** <i>Anopheles occidentalis</i>	<i>Ochlerotatus pullatus</i>	** <i>Culex restuans</i>
** <i>Anopheles punctipennis</i>	** <i>Ochlerotatus purpureipes</i>	* <i>Culex stigmatosoma</i>
<i>Aedes hemiteleus</i>	<i>Ochlerotatus schizopinax</i>	* <i>Culex tarsalis</i>
* <i>Aedes vexans</i>	** <i>Ochlerotatus sierrensis</i>	<i>Culex territans</i>
<i>Ochlerotatus atropalpus</i>	* <i>Ochlerotatus squamiger</i>	* <i>Culex thriambus</i>
<i>Ochlerotatus bicristatus</i>	<i>Ochlerotatus sticticus</i>	<i>Culiseta impatiens</i>
<i>Ochlerotatus campestris</i>	* <i>Ochlerotatus taeniorhynchus</i>	* <i>Culiseta incidens</i>
<i>Ochlerotatus cataphylla</i>	<i>Ochlerotatus tahoensis</i>	* <i>Culiseta inornata</i>
<i>Ochlerotatus clivis</i>	** <i>Ochlerotatus thelcter</i>	* <i>Culiseta particeps</i>
** <i>Ochlerotatus deserticola</i>	<i>Ochlerotatus ventrovittis</i>	<i>Coquillettidia perturbans</i>
* <i>Ochlerotatus dorsalis</i>	* <i>Ochlerotatus washinoi</i>	** <i>Orithopodomys signifera</i>
<i>Ochlerotatus fitchii</i>	** <i>Culex anips</i>	** <i>Psorophora columbiae</i>
<i>Ochlerotatus flavescens</i>	** <i>Culex apicalis</i>	** <i>Psorophora signipennis</i>
<i>Ochlerotatus hexodontus</i>	** <i>Culex boharti</i>	** <i>Uranotaenia anhydor</i>
<i>Ochlerotatus increpitus</i>	** <i>Culex erraticus</i>	
	* <i>Culex erythrothorax</i>	

* Species found in this region which are included in the keys.

** Species found in this region which are not included in the keys.
