

- NRP-11 Monitor requests for subdivision of agricultural: land preservationly developed and zoned parcels, located outside urban limit lines, in order to determine if present minimum parcel sizes are working effectively to discourage agricultural lands conversion.
- NRP-12 Review agricultural land conversion findings as described in NRP-11 with decision makers annually.
- NRP-13 Establish urban limit lines around existing and planned future communities, development nodes and other areas of urban use, in an effort to protect agricultural land and to encourage infill and concentric growth.
- NRP-14 Consult Important Farmland Maps and other sources of information on the relative value of agricultural lands when planning areas of growth, in order to direct growth and development toward lesser value agricultural lands.
- NRP-15 Recognize that, in order to realistically provide for the necessary diversity and growth required in the local economy, some lands presently committed to agriculture may be consumed by other development activities, and plan for and monitor such conversion to assure that it does not hinder or restrict existing agricultural operations. Priority shall be given to industries related to agriculture.
- NRP-16 Retain grazing land in large contiguous areas of the foothills, in recognition of its value to the livestock industry and as open space for watershed management, and its contribution to groundwater recharge, wildlife and waterfowl.
- NRP-17 Recognize that limited conversion of grazing lands to other uses may be less harmful to agriculture than conversion of cropland, if the new uses are properly planned and serviced.
- NRP-18 Support the U.S.D.A. Soil Conservation Service effort to update soils survey information in Glenn County.
- NRP-19 Support the erosion control programs, resource management programs, and agricultural conservation efforts of the Glenn County Resource Conservation District that benefit the county as a whole.
- NRP-20 Recognize the potential restrictions urbanization places on nearby agricultural: urban impacts practices and mitigate such conflicts whenever possible. Continue to support the County's "right to farm" ordinance and effort.
- NRP-21 Require notices of nonrenewal for Williamson Act lands as a condition of land division and boundary line changes which result in parcel sizes below zoning minimums.
