Note: "LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

a Based on the 82-year simulation period

b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

Alternative 4 H1 represents the low delta outflow scenario of Alternative 4.

Note: "LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

a Based on the 82-year simulation period

b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

Alternative 4 H1 represents the low delta outflow scenario of Alternative 4.

^a Based on the 16-year simulation period

^b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

Alternative 4 H2 represents the enhanced spring delta outflow scenario of Alternative 4.

^a Based on the 16-year simulation period

^b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

^c "Alternative 4 H4" represents the high delta outflow scenario of Alternative 4.

^a Based on the 16-year simulation period

^b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

Alternative 4 H1 represents the low delta outflow scenario of Alternative 4.

^b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

C.25. Sutter and Steamboat Slough Flows

Alternative 4 Scenario Definitions:
 H1 - Low Delta Outflow Scenario
 H2 - Enhanced Spring Delta Outflow Scenario
 H3 - Fall X2 Scenario
 H4 - High Delta Outflow Scenario

Figure C-25-1. Sutter and Steamboat Slough, Long-Term Average Flow

Alternative 4 Scenario Definitions:

H1 - Low Delta Outflow Scenario
H3 - Fall X2 Scenario

H2 - Enhanced Spring Delta Outflow Scenario
H4 - High Delta Outflow Scenario

*As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

Figure C-25-2. Sutter and Steamboat Slough, Wet Year* Average Flow

Alternative 4 Scenario Definitions:
 H1 - Low Delta Outflow Scenario
 H2 - Enhanced Spring Delta Outflow Scenario
 H3 - Fall X2 Scenario
 H4 - High Delta Outflow Scenario

*As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

Figure C-25-3. Sutter and Steamboat Slough, Above Normal Year* Average

Alternative 4 Scenario Definitions:

H1 - Low Delta Outflow Scenario
H3 - Fall X2 Scenario

H2 - Enhanced Spring Delta Outflow Scenario
H4 - High Delta Outflow Scenario

*As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

Figure C-25-4. Sutter and Steamboat Slough, Below Normal Year* Average

Alternative 4 Scenario Definitions:

H1 - Low Delta Outflow Scenario
H3 - Fall X2 Scenario

H2 - Enhanced Spring Delta Outflow Scenario
H4 - High Delta Outflow Scenario

*As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

Figure C-25-5. Sutter and Steamboat Slough, Dry Year* Average Flow

Alternative 4 Scenario Definitions:

H1 - Low Delta Outflow Scenario
H3 - Fall X2 Scenario

H2 - Enhanced Spring Delta Outflow Scenario
H4 - High Delta Outflow Scenario

*As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

Figure C-25-6. Sutter and Steamboat Slough, Critical Year* Average Flow

^a Based on the 16-year simulation period

^b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

Alternative 4 H4 represents the high delta outflow scenario of Alternative 4.

b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

The Elevations are based on National Geodetic Vertical Datum of 1929 (NGVD 29)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

a Based on the 16-year simulation period

b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

The Elevations are based on National Geodetic Vertical Datum of 1929 (NGVD 29)

LLT (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

Alternative 4 H3 represents the fall X2 scenario of Alternative 4.

a Based on the 16-year simulation period

b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

The Elevations are based on National Geodetic Vertical Datum of 1929 (NGVD 29)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

Alternative 4 H2 represents the enhanced spring delta outflow scenario of Alternative 4.

^a Based on the 16-year simulation period

^b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

The Elevations are based on National Geodetic Vertical Datum of 1929 (NGVD 29)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

Alternative 4 H4 represents the high delta outflow scenario of Alternative 4.

Critical (25%)	1.2	1.2	1.1	1.1	1.2	1.2	1.2	1.1	1.1	1.1	1.1	1.1

a Based on the 16-year simulation period

b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

The Elevations are based on National Geodetic Vertical Datum of 1929 (NGVD 29)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

a Based on the 16-year simulation period

b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

The Elevations are based on National Geodetic Vertical Datum of 1929 (NGVD 29)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

Alternative 4 H1 represents the low delta outflow scenario of Alternative 4.

^a Based on the 16-year simulation period

^b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

The Elevations are based on National Geodetic Vertical Datum of 1929 (NGVD 29)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

"Alternative 4 H2" represents the enhanced spring delta outflow scenario of Alternative 4.

a Based on the 16-year simulation period

b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

The Elevations are based on National Geodetic Vertical Datum of 1929 (NGVD 29)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

Alternative 4 H4 represents the high delta outflow scenario of Alternative 4.

a Based on the 16-year simulation period

b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

The Elevations are based on National Geodetic Vertical Datum of 1929 (NGVD 29)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

Alternative 4 H2 represents the enhanced spring delta outflow scenario of Alternative 4.

^a Based on the 16-year simulation period

^b As defined by the Sacramento Valley 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999)

The Elevations are based on National Geodetic Vertical Datum of 1929 (NGVD 29)

"LLT" (Late Long-Term) indicates Alternatives that are simulated with 2060 climate change and sea level rise.

Alternative 4 H3 represents the fall X2 scenario of Alternative 4.
