# California Great Basin Region

Welcome to the Bureau of Reclamation's California Great Basin Region

*Reclamation / California Great Basin Region / NEPA / Central California Area / Project Detail*

## Project Details

**Title:** Folsom Dam Safety and Flood Damage Reduction EIS/EIR\*\*\*\*\* Folsom Dam Safety and Flood Damage Reduction Supplemental Environmental assessment/Initial Study\*\*\*\*\* Folsom Dam Safety and Flood Damage Reduction Project ? Right Bank Stabilization FONSI

**Site:** [www.usbr.gov/mp/jfp/index.html](http://www.usbr.gov/mp/jfp/index.html)

**Summary:**

1. Reclamation seeks to improve public safety downstream of Folsom Dam by modifying the dam and its appurtenant structures. To mitigate potential safety concerns identified in previous and ongoing corrective action studies, potential modification alternatives will address a combination of hydrologic, seismic, and static issues of the Folsom Dam complex, which includes the Main Folsom Dam, Mormor Island Auxiliary Dam, the two wing dams and eight dikes. Potential modification alternatives include but are not limited to construction of an auxiliary spillway, dam and embankment raises, seismic retrofitting of structures, and dam and embankment static options. A major component of the project will be to locate and extract adequate borrow materials for embankment modifications. \*\*\*\*\*

2. The purpose of the Supplemental EA/IS is to describe and analyze the effects of construction actions and revisions to the project since the release of the Folsom DS/FDR Final EIS/EIR. The Folsom DS/FDR Project, as approved and authorized, is currently under construction. This document does not change the project originally described in the Joint Federal Project (JFP) Record of Decision (ROD) and Safety of Dams (SOD) ROD, but proposes revisions to certain project actions that require further environmental analysis. \*\*\*\*\*

3. For the Right Bank Stabilization Project, the Army Corps along with the CVFPB and SAFCA, proposes to install approximately 40 rock bolts along 400 feet of the lower right bank slope of the American River to stabilize a large rock mass. Reclamation will provide a Land Use Agreement to the Corps.

**Status**

<b>02/12/2015</b>	Reclamation signed the FONSI for the Folsom Dam Safety and Flood Damage Reduction Project ? Right Bank Stabilization project on February 9, 2014. Reclamation?s FONSI is supported by the Corps Final Supplemental Environmental Assessment/Environmental Impact Report prepared for the project.
<b>05/20/2009</b>	EIS/EIR: Notice of Intent published 10/6/05. Scoping meetings held 12/05. Draft EIS/EIR available 11/30/06. Files for main volume of the DEIS/EIR are available for viewing below. Record of Decision for Safety of Dams/Security signed May 1, 2007; Record of Decision for Joint Federal Project signed May 3, 2007. ***** The U.S. Army Corps of Engineers' Draft Post Authorization Change (PAC) Report is available at: <a href="http://www.usbr.gov/mp/jfp/news-info/index.html">http://www.usbr.gov/mp/jfp/news-info/index.html</a>
<b>04/15/2008</b>	Supplemental EA/IS: Draft EA/IS released for 30-day review on February 28, 2008. FONSI signed on April 14, 2008 and Final EA available April 15, 2008
