Reclamation / California-Great Basin / Area Offices / NCAO / Shasta Lake Water Resource Investigation (SLWRI)

REGION 10

Shasta Lake Water Resources Investigation

Current Project

- Shasta Dam and Reservoir Enlargement Project (Shasta Dam raise)
- Draft Supplemental Environmental Impact Statement (August 2020)

Historical Study

On July 29, 2015, Reclamation transmitted to Congress the Final Feasibility Report and Environmental Impact Statement for the Shasta Lake Water Resources Investigation.

The report describes the potential technical, environmental, economic, and financial evaluations prepared to date for alternatives to raise Shasta Dam, located approximately 10 miles northwest of Redding, Calif. The report also identifies next steps to identify construction cost share partners and project financing and develop the Recommended Plan.

The project is intended to increase water supply and water supply reliability for agricultural, municipal and industrial, and environmental purposes and increase survival of anadromous fish populations in the upper Sacramento River.
