- (1) Figures are generated from the most current version of the GIS data. Files dating from 1984 through 1992 were reprocessed with a standardized county line in the Albers Equal Area projection, and other
- (2) Due to signups for the federal Conservation Reserve Program, a significant number of acres converted from Farmland of Local Importance to Grazing Land in 1988.
- (3) Due to the incorporation of digital soil survey data (SSURGO) in 2000, acreages for farmland, grazing and other land categories may differ from those published in the 1998-2000 California Farmland Conversion Report. Data reflects mapping of Sw soil unit as Unique Farmland per verbal agreement with NRCS.
- (4) Due to the incorporation of an updated digital soil survey data (SSURGO) during this update, acreages for farmland, grazing and other land use categories may differ from those published in the 2000-2002 California Farmland Conversion Report.
- (5) Conversion of geospatial data to North American Datum 1983 (NAD 83) led to minor changes in total FMMP acreage beginning in 2014.
