Subject: Discussion of Public Services and Emergency Responders

Discussion of April Meeting between Authority/Integration and Maxwell Fire Department:

- Receives approximately 250 calls per year, which include East Park; frequently receive calls in the evening from East Park.
- Maxwell is likely going to be covering the area of the reservoir in Glenn County because a Glenn County fire department has gone out of business.
- Maxwell will be splitting duties with Willows Fire District in general.
- Currently the fire district only has several permanent staff and the rest are volunteers.
- Discussed supporting emergency services through different avenues including possibility of public safety station at the reservoir that would be shared by the fire department and sheriff at the admin building; helicopter pad(s); providing more equipment.
