

Please see attached Table of Contents from the Sites Reservoir Project Draft EIR/EIS. The full Draft EIR/EIS can be found at <http://sitesproject.org/information/DraftEIR-EIS>

Table of Contents

Chapters	Pages
Executive Summary	ES-1
Acronyms and Abbreviations	xxv
1. Introduction	1-1
1.1 Project Description	1-2
1.2 Project Operations.....	1-6
1.3 Project Background.....	1-7
1.4 Project Objectives, and Purpose and Need	1-11
1.5 Summary of CEQA and NEPA Requirements	1-12
1.6 Existing Conditions/No Project/No Action Condition.....	1-14
1.7 Intended Use of this Draft EIR/EIS	1-15
1.8 Study Areas.....	1-22
1.9 Areas of Controversy/Issues to be Resolved.....	1-26
1.10 Public Involvement	1-33
1.11 Organization of the Draft EIR/EIS	1-33
1.12 Preparers of the Draft EIR/EIS	1-35
2. Alternatives Analysis.....	2-1
2.1 Introduction.....	2-1
2.2 Approach to Alternatives Analysis.....	2-2
2.3 Existing Conditions, No Project Alternative, and No Action Alternative (Existing Conditions/No Project/No Action Condition).....	2-8
2.4 Sites Reservoir Alternatives.....	2-12
3. Description of the Sites Reservoir Project Alternatives.....	3-1
3.1 Sites Reservoir Project Features and Facilities	3-2
3.2 Construction and Operation/Maintenance Common to All Alternatives.....	3-92
3.3 Diversion and Reservoir Operations Common to All Action Alternatives.....	3-102
3.4 Proposed Operations by Alternative	3-110
3.5 Environmental Commitments Included as Part of the Project and Alternatives.....	3-113
4. Environmental Compliance and Permit Summary.....	4-1
4.1 Federal Policies or Approvals.....	4-1
4.2 State Policies or Approvals.....	4-14
4.3 Local/Regional Policies or Approvals	4-21
4.4 Primary Permits and Authorizations.....	4-22
5. Guide to the Resource Analyses	5-1
5.1 Introduction.....	5-1
5.2 Establishment of the Base Condition for the Environmental Setting/Affected Environment.....	5-2
5.3 Project Facilities Evaluated.....	5-3
5.4 Alternatives Analysis.....	5-4
5.5 Types of Impacts.....	5-6
5.6 Determination of Significance of Impacts	5-7
5.7 Mitigation Measure Development and Implementation	5-7
5.8 Topics Eliminated from Further Analytical Consideration.....	5-8
5.9 Tools, Analytical Methods, and Applications.....	5-8
5.10 Limitations of the Modeling Tools and Analytical Methods.....	5-18
6. Surface Water Resources	6-1
6.1 Introduction.....	6-1

Chapters	Pages
6.2 Environmental Setting/Affected Environment.....	6-1
6.3 Environmental Impacts/Environmental Consequences	6-33
6.4 Evaluation of Changes to CVP/SWP Operational Flexibility	6-54
7. Surface Water Quality.....	7-1
7.1 Introduction.....	7-1
7.2 Environmental Setting/Affected Environment.....	7-2
7.3 Environmental Impacts/Environmental Consequences	7-29
7.4 Mitigation Measures	7-84
8. Fluvial Geomorphology and Riparian Habitat.....	8-1
8.1 Introduction.....	8-1
8.2 Environmental Setting/Affected Environment.....	8-1
8.3 Environmental Impacts/Environmental Consequences	8-15
8.4 Mitigation Measures	8-30
9. Flood Control and Management	9-1
9.1 Introduction.....	9-1
9.2 Environmental Setting/Affected Environment.....	9-1
9.3 Environmental Impacts/Environmental Consequences	9-14
9.4 Mitigation Measures	9-41
10. Groundwater Resources	10-1
10.1 Introduction.....	10-1
10.2 Environmental Setting/Affected Environment.....	10-1
10.3 Environmental Impacts/Environmental Consequences	10-26
10.4 Mitigation Measures	10-55
11. Groundwater Quality	11-1
11.1 Introduction.....	11-1
11.2 Environmental Setting/Affected Environment.....	11-1
11.3 Environmental Impacts/Environmental Consequences	11-14
11.4 Mitigation Measures	11-35
12. Aquatic Biological Resources.....	12-1
12.1 Introduction.....	12-1
12.2 Environmental Setting/Affected Environment.....	12-1
12.3 Environmental Impacts/Environmental Consequences	12-51
12.4 Mitigation Measures	12-114
13. Botanical Resources.....	13-1
13.1 Introduction.....	13-1
13.2 Environmental Setting/Affected Environment.....	13-1
13.3 Environmental Impacts/Environmental Consequences	13-44
13.4 Mitigation Measures	13-112
14. Terrestrial Biological Resources.....	14-1
14.1 Introduction.....	14-1
14.2 Environmental Setting/Affected Environment.....	14-1
14.3 Environmental Impacts/Environmental Consequences	14-44
14.4 Mitigation Measures	14-126
15. Wetlands and Other Waters	15-1
15.1 Introduction.....	15-1
15.2 Environmental Setting/Affected Environment.....	15-1
15.3 Environmental Impacts/Environmental Consequences	15-13
15.4 Mitigation Measures	15-53
16. Geology, Minerals, Soils, and Paleontology.....	16-1
16.1 Introduction.....	16-1

Chapters	Pages
16.2	Environmental Setting/Affected Environment..... 16-1
16.3	Environmental Impacts/Environmental Consequences 16-28
16.4	Mitigation Measures 16-62
17.	Faults and Seismicity 17-1
17.1	Introduction..... 17-1
17.2	Environmental Setting/Affected Environment..... 17-1
17.3	Environmental Impacts/Environmental Consequences 17-24
17.4	Mitigation Measures 17-31
18.	Cultural/Tribal Cultural Resources 18-1
18.1	Introduction..... 18-1
18.2	Affected Environment..... 18-1
18.3	Environmental Impacts/Environmental Consequences 18-36
18.4	Mitigation Measures 18-56
19.	Indian Trust Assets 19-1
19.1	Introduction..... 19-1
19.2	Regulatory Background for ITAs 19-1
19.3	Environmental Setting/Affected Environment..... 19-2
19.4	Environmental Impacts/Environmental Consequences 19-7
19.5	Mitigation Measures 19-9
20.	Land Use 20-1
20.1	Introduction..... 20-1
20.2	Environmental Setting/Affected Environment..... 20-1
20.3	Environmental Impacts/Environmental Consequences 20-18
20.4	Mitigation Measures 20-39
21.	Recreation Resources..... 21-1
21.1	Introduction..... 21-1
21.2	Environmental Setting/Affected Environment..... 21-1
21.3	Environmental Impacts/Environmental Consequences 21-23
21.4	Mitigation Measures 21-59
22.	Socioeconomics 22-1
22.1	Introduction..... 22-1
22.2	Environmental Setting/Affected Environment..... 22-1
22.3	Environmental Impacts/Environmental Consequences 22-14
22.4	Mitigation Measures 22-68
23.	Environmental Justice..... 23-1
23.1	Introduction..... 23-1
23.2	Environmental Setting/Affected Environment..... 23-1
23.3	Environmental Impacts/Environmental Consequences 23-7
23.4	Mitigation Measures 23-19
24.	Air Quality 24-1
24.1	Introduction..... 24-1
24.2	Environmental Setting/Affected Environment..... 24-1
24.3	Environmental Impacts/Environmental Consequences 24-12
24.4	Mitigation Measures 24-30
25.	Climate Change and Greenhouse Gas Emissions 25-1
25.1	Introduction..... 25-1
25.2	Background..... 25-2
25.3	Greenhouse Gas Emissions..... 25-6
25.4	Climate Change..... 25-25

Chapters	Pages
26. Navigation, Transportation, and Traffic	26-1
26.1 Introduction.....	26-1
26.2 Environmental Setting/Affected Environment.....	26-1
26.3 Environmental Impacts/Environmental Consequences	26-18
26.4 Mitigation Measures	26-40
27. Noise.....	27-1
27.1 Introduction.....	27-1
27.2 Environmental Setting/Affected Environment.....	27-1
27.3 Environmental Impacts/Environmental Consequences	27-7
27.4 Mitigation Measures	27-35
28. Public Health and Environmental Hazards	28-1
28.1 Introduction.....	28-1
28.2 Environmental Setting/Affected Environment.....	28-1
28.3 Environmental Impacts/Environmental Consequences	28-18
28.4 Mitigation Measures	28-34
29. Public Services and Utilities	29-1
29.1 Introduction.....	29-1
29.2 Environmental Setting/Affected Environment.....	29-1
29.3 Environmental Impacts/Environmental Consequences	29-15
29.4 Mitigation Measures	29-34
30. Visual Resources.....	30-1
30.1 Introduction.....	30-1
30.2 Environmental Setting/Affected Environment.....	30-1
30.3 Environmental Impacts/Environmental Consequences	30-15
30.4 Mitigation Measures	30-39
31. Power Production and Energy	31-1
31.1 Introduction.....	31-1
31.2 Environmental Impacts/Environmental Consequences	31-20
31.3 Mitigation Measures	31-49
32. Relationship Between Short-term Uses and Long-term Productivity.....	32-1
32.1 Introduction.....	32-1
32.2 Short-term and Long-term Effects of the Alternatives	32-1
32.3 Conclusion	32-5
33. Irreversible or Irretrievable Resource Commitments.....	33-1
33.1 Introduction.....	33-1
33.2 Commitments of Resources by the Project’s Action Alternatives.....	33-1
33.3 Potential Environmental Accidents.....	33-3
33.4 Commitment of Future Generations to Similar Uses.....	33-4
34. Growth-inducing Impacts	34-1
34.1 Introduction.....	34-1
34.2 Environmental Impacts/Environmental Consequences and Growth-inducement Potential	34-2
34.3 Mitigation Measures	34-26
35. Cumulative Impacts	35-1
35.1 Introduction.....	35-1
35.2 Cumulative Project Selection.....	35-2
35.3 Cumulative Effects Analysis by Resource.....	35-15
36. Consultation and Coordination	36-1
36.1 Introduction.....	36-1
36.2 Notice of Preparation and Notice of Intent	36-1

Chapters	Pages
36.3	Public Scoping 36-1
36.4	Consultation 36-3
36.5	Coordination 36-6
36.6	Draft EIR/EIS and Project/Action Approval Process 36-10
37.	References 37-1
37.1	Chapter 1 Introduction 37-1
37.2	Chapter 2 Alternatives Analysis 37-2
37.3	Chapter 3 Description of the Sites Reservoir Project Alternatives 37-3
37.4	Chapter 4 Environmental Compliance and Permit Summary 37-3
37.5	Chapter 5 Guide to the Resource Analyses 37-3
37.6	Chapter 6 Surface Water Resources 37-4
37.7	Chapter 7 Surface Water Quality 37-7
37.8	Chapter 8 Fluvial Geomorphology and Riparian Habitat 37-13
37.9	Chapter 9 Flood Control and Management 37-13
37.10	Chapter 10 Groundwater Resources 37-14
37.11	Chapter 11 Groundwater Quality 37-15
37.12	Chapter 12 Aquatic Biological Resources 37-17
37.13	Chapter 13 Botanical Resources 37-36
37.14	Chapter 14 Terrestrial Biological Resources 37-38
37.15	Chapter 15 Wetlands and Other Waters 37-43
37.16	Chapter 16 Geology, Minerals, Soils, and Paleontology 37-44
37.17	Chapter 17 Faults and Seismicity 37-46
37.18	Chapter 18 Cultural/Tribal Cultural Resources 37-50
37.19	Chapter 19 Indian Trust Assets 37-54
37.20	Chapter 20 Land Use 37-54
37.21	Chapter 21 Recreation Resources 37-55
37.22	Chapter 22 Socioeconomics 37-59
37.23	Chapter 23 Environmental Justice 37-61
37.24	Chapter 24 Air Quality 37-62
37.25	Chapter 25 Climate Change and Greenhouse Gas Emissions 37-64
37.26	Chapter 26 Navigation, Transportation, and Traffic 37-69
37.27	Chapter 27 Noise 37-70
37.28	Chapter 28 Public Health and Environmental Hazards 37-71
37.29	Chapter 29 Public Services and Utilities 37-73
37.30	Chapter 30 Visual Resources 37-77
37.31	Chapter 31 Power Production and Energy 37-77
37.32	Chapter 32 Relationship Between Short-term Uses and Long-term Productivity 37-80
37.33	Chapter 33 Irreversible or Irretrievable Commitments 37-80
37.34	Chapter 34 Growth-inducing Impacts 37-80
37.35	Chapter 35 Cumulative Impacts 37-81
37.36	Chapter 36 Consultation and Coordination 37-82
38.	List of Preparers and Contributors 38-1
38.1	Introduction 38-1
38.2	Contributors to the Draft EIR/EIS 38-1
38.3	Contributors to the Preliminary Administrative Draft EIR/EIS 38-11
39.	EIR/EIS Document Distribution 39-1

Glossary

Appendixes

- Appendix 1 Introduction
 - 1A Mitigation Monitoring Plan
- Appendix 2 Alternatives Analysis
 - 2A Alternatives Screening Process
- Appendix 4 Environmental Compliance and Permit Summary
 - 4A Environmental Compliance
- Appendix 6 Surface Water Resources
 - 6A Modeling of Alternatives
 - 6B Water Resources System Modeling
 - 6B1 Project Operations
 - 6B2 River Operations
 - 6B3 Delta Operations
 - 6B4 Regional Deliveries
 - 6C Upper Sacramento River Daily River Flow and Operations Modeling
 - 6D Sensitivity Analysis Using the Latest CALSIM II Model
- Appendix 7 Surface Water Quality
 - 7A California State Water Resources Control Board Constituents of Concern of Water Bodies in the Study Area
 - 7B Central Valley Regional Water Quality Control Board Basin Plan Criteria
 - 7C Surface Water Quality Analysis for Electrical Conductivity at Proposed Intakes
 - 7D Sacramento-San Joaquin Delta Modeling
 - 7E River Temperature Modeling
 - 7F Sites Reservoir Discharge Temperature Modeling
- Appendix 8 Fluvial Geomorphology and Riparian Habitat
 - 8A Sedimentation and River Hydraulics Modeling
 - 8B Sacramento River Ecological Flows Tool
- Appendix 10 Groundwater Resources
 - 10A Groundwater Modeling
- Appendix 11 Groundwater Quality
 - 11A Groundwater Study Results 2007
- Appendix 12 Aquatic Biological Resources
 - 12A Aquatic Species Life Histories
 - 12B Fisheries Impact Assessment Methodology
 - 12C Fisheries Impact Summary
 - 12D Water Temperature Index Value Selection Rationale
 - 12E Fisheries Water Temperature Assessment Summary Tables
 - 12F Reservoir Water Surface Elevation Summary Tables
 - 12G Smelt Analysis
 - 12H Early Life-Stage Salmon Mortality Modeling
 - 12I Salmonid Population Modeling
 - 12J Winter Run Chinook Salmon Life Cycle Modeling

- 12K Delta Passage Modeling
- 12L Weighted Useable Area Analysis
- 12M Sturgeon Analysis
- 12N Yolo and Sutter Bypass Flow and Weir Spill Analysis
- Appendix 13 Botanical Resources
 - 13A Special-Status Plant Species Potentially Occurring in Secondary Study Area Aquatic Habitats
- Appendix 16 Geology, Minerals, Soils, and Paleontology
 - 16A Soil Types within the Primary Study Area
 - 16B Colusa County Fossil Sites
 - 16C Results of the Paleontological Resources Literature Review
- Appendix 21 Recreation Resources
 - 21A Impact of Sites Reservoir Project Operations on Recreation-Day Benefit Values
 - 21B Impact of Sites Reservoir Project Operations on Usability of Reservoir Boat Ramps
- Appendix 22 Socioeconomics
 - 22A Economics Analytical Framework
 - 22B Reporting Metrics Tool
 - 22C Regional Economics Modeling
 - 22D Urban Water Supply Economics Modeling
 - 22E Urban Water Quality Economics Modeling
 - 22F Agricultural Supply Economics Modeling
- Appendix 24 Air Quality
 - 24A Methodology for Air Quality and GHG Emissions Calculations
- Appendix 25 Climate Change and Greenhouse Gas Emissions
 - 25A Climate Change and Sea Level Rise Sensitivity Analysis
 - 25B Climate Change Sensitivity Analysis using WSIP Climate Change Projections
- Appendix 28 Public Health and Environmental Hazards
 - 28A California Superfund and Brownfield Sites
 - 28B Mosquitoes and Other Vectors
 - 28C Environmental Records Searches
- Appendix 31 Power Production and Energy
 - 31A Power Planning Study (PARO)
 - 31B CVP-SWP Power Modeling
- Appendix 34 Growth Inducing Impacts
 - 34A Growth-Inducing Considerations for Municipal and Industrial Water Users
- Appendix 36 Consultation and Coordination
 - 36A Supplemental Scoping Report
 - 36B Scoping Report

Tables

	Pages
1-1	Primary Anticipated Permits, Approvals, and Authorizations for the Sites Reservoir Project... 1-17
2-1	Summary of Dams and Embankment Volume of Potential Sites Reservoir Storage Sizes 2-15
2-2	Conveyance Facilities Alternatives Considered for Sites Reservoir..... 2-16
2-3	Sacramento River Direct Release Potential for the Sites Reservoir Conveyance Options 2-18
2-4	Sites Reservoir Storage and Conveyance Options Combinations..... 2-20
2-5	Preliminary Sites Reservoir Storage and Conveyance Options Combinations..... 2-21
3-1	Comparison of New Project Facilities and Features and Existing Facilities Relied Upon 3-3
3-2	Permanent Facility Footprint – Alternative A..... 3-9
3-3	Characteristics of Proposed 1.3-MAF Sites Reservoir Dams for Alternative A..... 3-13
3-4	Sites Reservoir Project Onsite or Nearby Dam Materials..... 3-14
3-5	Sites Reservoir Inlet/Outlet Structure Tower Details 3-26
3-6	Sites Pumping-generating Plant Configuration for Alternative A 3-28
3-7	Characteristics of Project Roadways and South Bridge Approaches..... 3-35
3-8	Proposed South Bridge Characteristics..... 3-37
3-9	Characteristics of Proposed Minor Structures 3-37
3-10	Approximate Number of Facilities at the Recreation Areas 3-46
3-11	Aboveground Features Associated with the Proposed Delevan Pipeline 3-73
3-12	Permanent Facility Footprint – Alternative B..... 3-77
3-13	Characteristics of the Proposed Sites Reservoir Dams for Alternative B (and Alternatives C and D) 3-79
3-14	Proposed Sites Pumping-generating Plant Configuration for Alternative B 3-81
3-15	Permanent Facility Footprint – Alternative C..... 3-83
3-16	Sites Pumping-generating Plant Configuration for Alternative C 3-84
3-17	Permanent Facility Footprint – Alternative C ₁ 3-84
3-18	Permanent Facility Footprint – Alternative D 3-87
3-19	Approximate Number of Facilities at the Proposed Recreation Areas 3-88
3-20	Estimated Construction Durations and Equipment Days for Construction of Sites Reservoir Project..... 3-93
3-21	Expected Roadway Access Routes to Project Facilities 3-95
3-22	Project-related Construction Personnel and Highway Truck Trips 3-98
3-23	Estimated Equipment Hours for Operation and Maintenance of Sites Reservoir Project 3-100
3-24	Description of Proposed Seasonal Schedule for Project Operations 3-103
3-25	Comparison of Project Operations by Alternative 3-111
4-1	Applicable Federal, State, and Local Permits and Approvals..... 4-24
5-1	Impact Naming Convention for each of the Resources Evaluated 5-5
5-2	Overview of Sites Reservoir Project EIR/EIS Modeling Tools, Analytical Methods, and Applications 5-9
6-1	Summary of CVP and SWP Existing Conditions/No Project/No Action Condition Demands (TAF/Year) 6-12
6-2	Trinity River Record of Decision Annual Flow Volumes and Peak Flows 6-15
6-3	Stone Corral Creek Daily and Monthly Flows Near Sites, USGS 11390672 Period of Record 4/1/1958 – 9/30/1964 and 10/1/1965 – 9/30/1985 Drainage Area = 38.2 Square Miles 6-32
6-4	Colusa Basin Drain Daily and Monthly Flows at Highway 20 Period of Record 11/1/1944 - 9/30/1994 Drainage Area = 973 square miles..... 6-33

Tables	Pages
6-5 Annual CVP Deliveries (TAF) Alternatives A, B, C, and D Compared to the Existing Conditions/No Project/No Action Condition.....	6-39
6-6 Annual SWP Regional Deliveries (TAF) Alternatives A, B, C, and D Compared to the Existing Conditions/No Project/No Action Condition.....	6-41
6-7 Sites Reservoir End of Month Storage (TAF) Alternatives A, B, C, and D Compared to the Existing Conditions/No Project/No Action Condition.....	6-52
6-8 Delevan Pipeline Intake/Discharge Facilities Monthly Flow (cfs) Alternatives A, B, C, and D Compared to the Existing Conditions/No Project/No Action Condition	6-53
6-9 Total Annual North-of-the-Delta Storage (TAF).....	6-55
7-1 Designated Beneficial Uses within the Extended, Secondary, and Primary Study Areas	7-3
7-2 Water Quality Objectives for Temperature in the Trinity River.....	7-11
7-3 Trinity River Temperature Criteria for the Hoopa Valley Indian Reservation.....	7-12
7-4 Water Quality Objectives for Temperature in the Sacramento River.....	7-14
9-1 Sacramento River Basin Multi-Purpose Flood Management Reservoirs.....	9-3
9-2 Sacramento River Leveed Capacity.....	9-9
9-3 Feather River Leveed Capacity.....	9-9
10-1 Major Lithologic Units of the Sacramento Valley.....	10-9
10-2 Wells Located within a 1-mile Radius of the Proposed Sites Reservoir Footprint.....	10-18
10-3 Summary of Well Data by Well Type for Wells Located within a 1-mile Radius of the Sites Reservoir Footprint	10-19
10-4 Wells Located within a 1-mile Radius of the Proposed Holthouse Reservoir Complex and Terminal Regulating Reservoir Pipeline.....	10-20
10-5 Wells Located within 1 Mile of the Delevan Pipeline and Associated Facilities	10-21
10-6 Wells Located within a 1-mile Radius of the Terminal Regulating Reservoir Complex	10-25
12-1 Fish Species of Management Concern in Export Service Area Reservoirs in the Extended Study Area	12-4
12-2 Species of Management Concern in the Secondary Study Area.....	12-6
12-3 Fish Species of Management Concern in the Primary Study Area.....	12-45
12-4 Project Facilities in the Primary Study Area and the Potentially Affected Waterways.....	12-46
12-5 Fish Species Observed by CDFW during Sampling Efforts in the Proposed Sites Reservoir Inundation Area.....	12-49
12-6 Fish Species Observed by CDFW during Sampling Efforts in the Colusa Basin Drain.....	12-50
12-7 Construction- and Operation-related Impact Indicators.....	12-66
12-8 Summary of Mitigation Measures for Sites Reservoir Project Impacts on Aquatic Biological Resources	12-114
13-1 Invasive Weed Species Potentially Present in Wildlife Refuges Receiving Level 4 Water Supply in the Extended Study Area	13-3
13-2 Special-status Species Potentially Present in the Extended Study Area.....	13-6
13-3 Manual of California Vegetation Alliances in the Secondary Study Area	13-9
13-4 Number of Special-status Plant Species by Rank in the Secondary Study Area	13-10
13-5 Number of Special-status Plant Species by Region and Status.....	13-13
13-6 Vegetation Types within the Primary Study Area	13-31
13-7 Vegetation Types at Each Project Facility Location.....	13-35
13-8 Noxious Weed Species Known or Likely to Occur in the Primary Study Area	13-36
13-9 Federal- and State-listed Plant Species with Potential to Occur in the Primary Study Area	13-40
13-10 CNPS Rare Plant Rank 1, 2, and 3 Plant Species with Potential to Occur in the Primary Study Area	13-41
13-11 Special-status Plant Species and Occurrences Found during Field Surveys by Species for Surveyed Primary Study Area	13-43

Tables	Pages
13-12 Permanent Vegetation Loss Due to the Construction of the 1.3-MAF Sites Reservoir and Associated Dams: Alternative A	13-65
13-13 Permanent Vegetation Loss and Temporary Disturbance Due to the Construction of Recreation Areas and Associated Electrical Distribution Lines: Alternative A	13-70
13-14 Permanent Vegetation Loss and Temporary Disturbance Due to the Construction of the Road Relocations and South Bridge: Alternative A	13-73
13-15 Permanent Vegetation Loss Due to Construction of the Sites Pumping/Generating Plant, Sites Reservoir Inlet/Outlet Structure, Sites Electrical Switchyard, and the Field Office Maintenance Yard: Alternative A	13-78
13-16 Permanent Vegetation Loss and Temporary Disturbance Due to the Construction of the Holthouse Reservoir Complex: Alternative A	13-81
13-17 Temporary Disturbance of Vegetation Communities Due to Modifications of the Glenn-Colusa Irrigation District Canal Facilities: Alternative A	13-85
13-18 Permanent Vegetation Loss and Temporary Disturbance Due to the Construction of the Terminal Regulating Reservoir Facilities: Alternative A	13-87
13-19 Permanent Vegetation Loss and Temporary Disturbance Due to the Construction of the Delevan and Terminal Regulating Reservoir Pipelines, Terminal Regulating Reservoir Pipeline Road, and Delevan Pipeline Electrical Switchyard: Alternative A.....	13-88
13-20 Temporary Disturbance of Vegetation Due to the Construction of the Sites/Delevan Overhead Power Line: Alternative A	13-92
13-21 Permanent Vegetation Loss Due to the Construction of the Delevan Pipeline Intake/ Discharge Facilities: Alternative A.....	13-95
13-22 Acres of Vegetation Types Within the Project Buffer: Alternative A	13-97
13-23 Acres of Vegetation Types Subject to Alternative A Construction Impacts.....	13-99
13-24 Permanent Vegetation Loss Due to the Construction and Filling of the 1.8-MAF Sites Reservoir and Associated Dams: Alternative B Compared to Alternative A	13-104
13-25 Temporary Disturbance of Vegetation Due to the Construction of the Sites/Delevan Overhead Power Line: Alternative B Compared to Alternative A	13-105
13-26 Permanent Vegetation Loss Due to the Construction of the Delevan Pipeline Discharge Facilities: Alternative B Compared to the Alternative A Delevan Pipeline Intake/ Discharge Facilities.....	13-106
13-27 Acres of Vegetation Subject to Alternative B Construction Impacts	13-107
13-28 Acres of Vegetation Types Subject to Alternative C Construction Impacts.....	13-109
13-29 Acres of Vegetation Types Subject to Alternative D Construction Impacts from Delevan Overhead Power Line and Substation.....	13-111
13-30 Summary of Mitigation Measures for North-of-the-Delta Offstream Storage Project Impacts on Botanical Resources	13-112
14-1 Wildlife Habitat Types within the Primary Study Area.....	14-18
14-2 Wildlife Habitat Types at Each Project Facility Location	14-22
14-3 State- and Federally Listed Terrestrial Wildlife Species that Potentially Occur in the Primary Study Area.....	14-23
14-4 Nearest Bank Swallow Colony Locations to the Delevan Pipeline Intake/Discharge Facilities.....	14-26
14-5 Terrestrial Wildlife Species of Special Concern that Potentially Occur in the Primary Study Area	14-29
14-6 Commercially or Recreationally Important Wildlife Species that May Occur within the Primary Study Area.....	14-42
14-7 Acres of Wildlife Habitat Subject to Direct Permanent Loss from the Construction and Filling of the 1.3-MAF Sites Reservoir and Associated Dams: Alternative A.....	14-69

Tables	Pages
14-8 Avian Species Expected to Benefit from an Increase in Open Water Habitat within the Sites Reservoir Inundation Area	14-71
14-9 Permanent Wildlife Habitat Loss and Temporary Disturbance Due to the Construction of the Recreation Areas and Associated Electrical Distribution Lines: Alternative A	14-76
14-10 Permanent Wildlife Habitat Loss and Temporary Disturbance Due to the Construction of the Road Relocations and South Bridge: Alternative A.....	14-79
14-11 Acres of Wildlife Habitat Subject to Direct and Permanent Habitat Loss from Construction of the Sites Pumping/Generating Plant, Sites Reservoir Inlet/Outlet Structure, Sites Electrical Switchyard, and the Field Office Maintenance Yard: Alternative A.....	14-84
14-12 Permanent Wildlife Habitat Loss and Temporary Disturbance Due to the Construction of the Holthouse Reservoir Complex: Alternative A	14-87
14-13 Temporary Disturbance of Wildlife Habitat Due to Modifications of the Glenn-Colusa Irrigation District Canal Facilities: Alternative A.....	14-91
14-14 Permanent Wildlife Habitat Loss and Temporary Disturbance Due to the Construction of the Terminal Regulating Reservoir Facilities: Alternative A	14-93
14-15 Permanent Wildlife Habitat Loss and Temporary Disturbance Due to the Construction of the Delevan and Terminal Regulating Reservoir Pipelines, Terminal Regulating Reservoir Pipeline Road, and Delevan Pipeline Electrical Switchyard: Alternative A.....	14-96
14-16 Temporary Disturbance of Wildlife Habitat from Construction of the Sites/Delevan Overhead Power Line: Alternative A	14-101
14-17 Permanent Wildlife Habitat Loss Due to the Construction of the Delevan Pipeline Intake/Discharge Facilities: Alternative A.....	14-104
14-18 Acres of Wildlife Habitat within the Project Buffer: Alternative A	14-108
14-19 Acres of Wildlife Habitat Subject to Alternative A Construction Impacts.....	14-110
14-20 Permanent Wildlife Habitat Loss Due to the Construction and Filling of the 1.8-MAF Sites Reservoir and Associated Dams: Alternative B Compared to Alternative A	14-116
14-21 Temporary Disturbance of Wildlife Habitat Due to the Construction of the Sites/Delevan Overhead Power Line: Alternative B Compared to Alternative A	14-117
14-22 Direct and Permanent Wildlife Habitat Loss Due to the Construction of the Delevan Pipeline Discharge Facility: Alternative B Compared to the Alternative A Delevan Pipeline Intake/Discharge Facilities.....	14-119
14-23 Acres of Wildlife Habitat Subject to Alternative B Construction Impacts	14-120
14-24 Acres of Wildlife Habitat Subject to Alternative C Construction Impacts	14-122
14-25 Acres of Wildlife Habitat Subject to Direct Permanent Loss from the Construction and Operational Impacts from the Delevan Overhead Power Line and Substation: Alternative D.....	14-125
14-26 Summary of Mitigation Measures for NODOS Project Impacts to Terrestrial Biological Resources	14-126
14-27 Avoidance Distances and Restrictions for Nesting Species.....	14-130
15-1 Potentially Affected Wetlands and Other Waters in the Extended Study Area (National Wetlands Inventory Types).....	15-2
15-2 Potentially Affected Waters in the Secondary Study Area: Rivers and Streams	15-4
15-3 Potentially Affected Waters in the Secondary Study Area: Lakes and Reservoirs.....	15-5
15-4 Potentially Affected Waters in the Secondary Study Area: Wetlands.....	15-5
15-5 Presence of Wetlands and Other Waters at Each Proposed Project Facility.....	15-7
15-6 Acre Summary of Wetlands and Other Waters in the Primary Study Area.....	15-8
15-7 Direct Loss of Wetlands and Other Waters Due to the Construction of the 1.3-MAF Sites Reservoir Inundation Area and Dams	15-20
15-8 Direct Loss of Wetlands and Other Waters Due to the Construction of the Recreation Areas	15-23

Tables	Pages
15-9 Direct Loss of Wetlands and Other Waters Due to the Construction of the Road Relocations and South Bridge.....	15-26
15-10 Direct Loss of Wetlands and Other Waters Due to the Construction of the Sites Reservoir Inlet/Outlet Structure, Sites Pumping/Generating Plant, Sites Electrical Switchyard, Tunnel from Sites Pumping/Generating Plant to Sites Reservoir Inlet/Outlet Structure, and Field Office Maintenance Yard.....	15-29
15-11 Direct Loss of Wetlands and Other Waters Due to the Construction of the Holthouse Reservoir Complex	15-30
15-12 Direct Loss of Wetlands and Other Waters Due to the Construction of the TRR, TRR Pumping/Generating Plant, TRR Electrical Switchyard, and the GCID Main Canal Connection to the TRR	15-33
15-13 Direct Loss of Wetlands and Other Waters Due to the Construction of the Sites/Delevan Overhead Power Line East of the Sites Electrical Switchyard	15-34
15-14 Loss of Wetlands and Other Waters Due to the Construction of the Delevan Pipeline, Terminal Regulating Reservoir Pipeline, Terminal Regulating Reservoir Pipeline Road, and Delevan Pipeline Electrical Switchyard.....	15-36
15-15 Direct Loss of Wetlands and Other Waters Due to the Construction of the Delevan Pipeline Intake/Discharge Facilities.....	15-39
15-16 Affected Acres of Wetlands and Other Waters for All Project Facilities: Alternative A	15-42
15-17 Direct Loss of Wetlands and Other Waters Due to the Construction of the 1.8-MAF Sites Reservoir Inundation Area and Dams.....	15-44
15-18 Direct Loss of Wetlands and Other Waters Due to the Construction of the Delevan Pipeline Discharge Facilities.....	15-47
15-19 Affected Acres of Wetlands and Other Waters for All Project Facilities: Alternative B	15-49
15-20 Affected Acres of Wetlands and Other Waters for All Project Facilities: Alternative C	15-51
15-21 Summary of Mitigation Measures for Sites Reservoir Project Impacts to Wetlands and Other Waters	15-54
16-1 Fossils and Fossil Locations within the Extended Study Area	16-5
16-2 Fossils and Fossil Locations within the Secondary Study Area	16-10
16-3 Coast Range Rock Units in the Primary Study Area	16-13
16-4 Major Soil Types at Sites Reservoir (Alternative A).....	16-18
16-5 Major Soil Types at Sites Reservoir (Alternatives B, C, and D)	16-18
16-6 Results of Paleontological Records Search by Geological Unit for the Primary Study Area	16-23
16-7 Great Valley Sequence Units in the Primary Study Area that Yield Megafossils	16-24
16-8 Paleontological Sensitivity of the Rock Units within 1 Mile of Any Proposed Primary Study Area Project Facility.....	16-27
16-9 Summary of Mitigation Measures for Sites Reservoir Project Impacts to Paleontological Resources	16-62
17-1 Comparison of Fault Activity Classification between the California Geological Survey and Division of Safety of Dams	17-2
17-2 Comparison of Richter Magnitude and Modified Mercalli Intensity.....	17-3
17-3 Regional Faults in the Secondary Study Area	17-8
17-4 Faults in Proximity to the Proposed Sites Reservoir and Sites and Golden Gate Dam sites	17-13
18-1 Built Environment Resources Identified Outside of the Sites Reservoir Inundation Area in the Primary Study Area.....	18-21
18-2 Native American Consultation Per AB 52	18-24
18-3 Summary of Mitigation Measures for Project Impacts on Cultural Resources.....	18-56
19-1 Federally Recognized Tribes in the Vicinity of the Extended, Secondary, and Primary Study Areas Organized by County	19-3

10-2 Subbasins of the Sacramento Valley Groundwater Basin	10-13
10-3 Spring 2016 Groundwater Elevation Contour Map	10-14
10-4 Fall 2015 Groundwater Elevation Contour Map.....	10-15
10-5 Change in Groundwater Elevation Spring 2004 to Spring 2014.....	10-16
10-6A CVHM-Forecast Sacramento River Stages and Groundwater Elevations after 24.8 Years for Alternative A and Existing Conditions/No Project/No Action Condition	10-34
10-6B Groundwater-Surface Water Exchange Differences between Sites Alternative A and Existing Conditions/No Project/No Action Condition.....	10-35
10-7A CVHM-Forecast Sacramento River Stages and Groundwater Elevations after 24.8 Years for Alternative B and Existing Conditions/No Project/No Action Condition.....	10-44
10-7B Groundwater-Surface Water Exchange Differences between Sites Alternative B and Existing Conditions/No Project/No Action Condition.....	10-45
10-8A Simulated Groundwater Elevations Versus Time near the SACFEM ₂₀₁₃ Model Boundary	10-48
10-8B Simulated Groundwater Elevations Versus Time at the Orchards Southeast of Funks Creek	10-49
10-9A Simulated Increase in Groundwater Level Due to Seepage from Sites and Holthouse Reservoirs, Alternative B Shallow Aquifer, February 1980.....	10-51
10-9B Simulated Increase in Groundwater Level Due to Seepage from Sites and Holthouse Reservoirs, Alternative B Shallow Aquifer, April 1983	10-52
11-1A Simulated Change in Groundwater Flow Direction Due to Seepage from Sites and Holthouse Reservoirs Alternative B, Shallow Aquifer, February 1980.....	11-31
11-1B Simulated Change in Groundwater Flow Direction Due to Seepage from Sites and Holthouse Reservoirs Alternative B, Shallow Aquifer, April 1983.....	11-32
12-1 Sacramento River Watershed.....	12-5
12-2 Feather River Watershed.....	12-19
12-3 Trinity River Watershed	12-27
12-4 American River Watershed.....	12-30
12-5 Waterways within the Primary Study Area.....	12-48
12-6 Proposed Project Facility Locations	12-85
12-7 Proposed Project Facility Locations	12-87
12-8 Proposed Project Facility Locations	12-98
12-9 Proposed Project Facility Locations	12-99
13-1 Secondary Study Area Regions for Analysis of Potential Special-status Plant Species.....	13-12
13-2 Vegetation Types near Project Facility Locations	13-29
13-3 Riparian Sites along Funks Creek Impacted by Dams.....	13-79
13-4 Alkaline Wetland Area Overlapping with Holthouse Reservoir Complex	13-83
13-5 Former Alkaline Wetland in Delevan Pipeline Construction Disturbance Area	13-90

Figures	Pages
16-1 Geomorphic Provinces of California	16-2
16-2 Generalized Geologic Map and Rock Units Within the Primary Study Area.....	16-11
17-1 Simplified Fault Activity in California	17-6
17-2 Regional Faults	17-7
17-3 Regional Seismicity	17-11
17-4 Faults in the Vicinity of Project Dam Sites.....	17-15
17-5 Faults near Golden Gate Dam Site.....	17-16
17-6 Faults near Sites Dam Site	17-17
17-7 Median and 84th Percentile Deterministic Response Spectra.....	17-19
17-8 DSOD Consequence-hazard Matrix.....	17-20
18-1 Archeological Region and Subregion Boundaries	18-3
18-2 Native American Tribal Land Boundaries	18-7
20-1 Glenn and Colusa County Zoning Designations within Construction Footprint	20-9
20-2 Glenn and Colusa County Zoning Designations within Permanent Footprint.....	20-10
20-3 Agricultural Land Designations within Construction Footprint	20-11
20-4 Agricultural Land Designations within Permanent Footprint.....	20-12
20-5 Colusa County Zoning Designations within Overhead Power Line Alignment (Alternative D).....	20-16
20-6 Agricultural Land Designations within Overhead Power Line Alignment (Alternative D)	20-17
21-1 Existing Lakes and Reservoirs in the Extended Study Area.....	21-4
21-2 Existing Lakes and Reservoirs in the Secondary Study Area.....	21-9
21-3 Project Operations – Reservoir Point Rating Graph	21-27
23-1 Primary Study Area Minority Population Distribution.....	23-13
23-2 Primary Study Area Low-income Population Distribution.....	23-17
24-1 Project Location Relative to Air Basins and Air Districts	24-5
25-1 The Greenhouse Gas Effect	25-3
25-2 Graphical Depiction of the Analytical Process for Incorporating Climate Change into the CALSIM II Model for Water Resources Planning Purposes.....	25-37
26-1 Construction and Maintenance Access Routes to Project Facilities	26-3
30-1A Sites Reservoir Photo Locations	30-41
30-1B Holthouse Reservoir Complex and TRR Complex Photo Locations.....	30-42
30-1C Delevan Overhead Power Line, Delevan Pipeline, and Delevan Pipeline Intake/Discharge Facilities Photo Locations.....	30-43
30-1D RBPP and GCID Facilities Photo Locations.....	30-44
30-2A Northern Portion of Sites Reservoir Inundation Area and Saddle Dam Recreation Area Landscape Character Photo.....	30-45
30-2B Sites Reservoir Inundation Area Landscape Character Photos.....	30-47
30-2C Sites Reservoir Inundation Area Landscape Character Photos.....	30-48
30-2D Golden Gate Dam Landscape Character Photos	30-49
30-2E Golden Gate Dam and Sites Dam Landscape Character Photos.....	30-50
30-2F Sites Dam and Saddle Dams 1 and 2 Landscape Character Photos	30-51
30-2G Saddle Dam 3 Landscape Character Photo	30-52
30-2H Stone Corral Recreation Area Landscape Character Photo	30-53
30-2I Peninsula Hills Recreation Area Landscape Character Photo	30-54
30-2J Peninsula Hills and Antelope Island Recreation Areas Landscape Character Photos	30-55
30-2K Lurline Headwaters Recreation Area and South Bridge Landscape Character Photos.....	30-56
30-2L Sites Reservoir Pumping/Generating Plant and Inlet/Outlet Structure Landscape Character Photos	30-57
30-2M Field Office Maintenance Yard and Existing Funks Reservoir Landscape Character Photo ...	30-59
30-2N Holthouse Reservoir Complex Landscape Character Photo	30-60

Figures	Pages
30-2O Proposed GCID Canal Headgate Structure and Canal Lining Location Landscape Character Photo.....	30-61
30-2P GCID Canal Railroad Siphon Replacement Landscape Character Photos	30-63
30-2Q Red Bluff Pumping Plant and TRR Facilities Landscape Character Photos.....	30-64
30-2R Terminal Regulating Reservoir Landscape Character Photos	30-65
30-2S Sites/Delevan Overhead Power Line and Delevan Pipeline Landscape Character Photo	30-67
30-2T Delevan Overhead Power Line and Delevan Pipeline Landscape Character Photo	30-68
30-2U Delevan Pipeline Intake/Discharge Facilities and Communication Towers Landscape Character Photos	30-69
30-2V Overhead Power Line (Alternate Alignment) Landscape Character Photo	30-71
30-2W Boat Ramp Landscape Character Photo.....	30-72
31-1 Western Electricity Coordinating Council, 2015 Non-coincident Peak Demand by Balancing Authority Area	31-3
31-2 Installed In-State Electric Generation Capacity by Fuel Type.....	31-6
31-3 California Electric Transmission System.....	31-11
31-4 Regional Transmission Lines and Substations.....	31-21
