Good morning Laverne and Isaac

Thank you for the very productive meeting on Friday. It was a pleasure to meet with you about the Sites Reservoir Project and the proposed geotechnical investigations.

I just sent the following items to you via our secure file transfer, Hightail:

- KMZs for the geotechnical investigation locations, areas previously surveyed for cultural resources, locations of recorded archaeological sites, locations of recorded isolates. If you prefer shape files, let me know and I will get them from my GIS staff. I know you mentioned that you are only interested in the prehistoric site/isolate data, but I am afraid we don't have them separated from the historic sites in the KMZ. Please let me know if you want my GIS folks to separate them out for you in a shape file; I don't think it would take them long.
- The draft archaeological survey report. I need to emphasize that this is a draft. While the data are correct, our contract with Reclamation ended before we could do serious editing and incorporate comments from Reclamation. We will be working on preparing a final as we move forward with the project.

Please don't hesitate to let me know if you need anything else. We are looking forward to working with you as this important project progresses.

Thanks

janis
