Good morning, Eric and Socorro

Attached please find the final version of the Post Review Discovery Plan, Archaeological Monitoring Plan, and Burial Treatment Plan for the 2022-2024 Sites Reservoir Geologic, Geophysical, and Geotechnical Investigations for your records.

We had previously sent you a version in track changes to show the edits we made in response to your comments; this was on November 9, 2022. We then sent that document to the Bureau of Reclamation for review. Their only comment was to add a comma at one location, which we did. The attached document includes all of the revisions requested by Yocha Dehe and the Bureau of Reclamation, and is considered final.

Eric, I also thought that I would check in on the status of the Tribe's comments on the Environmental Impact Report. Do you still intend to submit comments?

Best regards
janis
