Cited Information: Casey recommends using the same thresholds and approach as the previous analysis/draft EIR (the thresholds from Tehama County Air Pollution Control District), but this does not seem to be a formal policy. Colusa County APCD may have offset mitigation programs established, but Casey will need to look into this further. ICF team will likely follow up regarding the mitigation programs, depending on the results of the emissions analysis. Casey noted that, for health risks, 10 cancer risks per million is appropriate.
