

V1-004-Ch00_Exec_Summ_AdminFinal

Page ES 25. Acronym for No Adverse Effect should probably be (NAE) rather than (NE).

V1-007-Ch02_PD_AdminFinal

Page 2-21. "The use of these federal facilities [RBPP and TC Canal] is included in the Project, and thus the impacts of the anticipated Warren Act contract(s) are covered by this Final EIR/EIS."

- Does not contemplate use of any other federal facility, i.e. Jones, San Luis Canal, Delta-Mendota Canal, or San Luis Reservoir. Site specific NEPA will need to be done if use of these facilities is required to convey the non-CVP Water (i.e. Sites Project Water).

Page 2-83, third bullet

- "CVP 215 water" should read "water diverted pursuant to Section 215 of the Reclamation Reform Act"
- "Article 3F" water should read "Article 3(f)" as it's Article 3(f) in the water service/repayment contracts.
- And I don't know that Reclamation would categorize Section 215 and Article 3(f) water as "other **water rights** diversions" as the text suggests. I would say "other annual and long term contractual obligations having agreed upon priority over Sites".

Pages 2-91 and 2-92, Fall-Run Redd Maintenance

- "Sites Reservoir would subsequently release an equivalent amount of water to meet CVP needs in the spring and summer." Do you mean of the following calendar year? Or "**would have released** an equivalent amount of water in the spring and summer"? I thought all exchanges were taking place in the same calendar year. This implies we're crossing calendar years.
- The last sentence of this bullet could stand to be rewritten: The water that can be pumped instead of what would have been reduced to meet Fall X2 could be delivered to Storage Partners.

Page 2-92, Spring Pulse Assistance

- "...Reclamation may transfer its Sites Project water stored in Sites Reservoir to the other Storage Partners in lieu of diversions by the Authority."

Page 2-92, Real-Time Exchanges or Transfers with Local Storage Partners: "This type of exchange or transfer is most likely to occur with GCID but could also occur with the Sacramento River Settlement Contractors and Reclamation." What is being contemplated here? Why is GCID called out?
